IMPACT OF COVID19 on Agrochemical Industry

Agriculture remains a central pillar of the Indian economy. The sector serves the food consumption needs of the whole country, while also placing among the top exporters of agricultural produce in the world. The sector has been facing its share of challenges in recent years, but few have been as severe by the drastic effects of Covid-19.

A public healthcare emergency like the on-going pandemic hurts every aspects of human life and hence, economy cannot remain insulated. Agrochemicals also have been affected by the rapid spread of the contagious diseases that forced the economy to shut. The pandemic struck us at a time when the Rabi crops were being harvested and fear was rife that lockdown would delay harvesting due to shortage of labour. Even if it is harvested, taking them to the market place would be challenging. Fish and poultry suffered due to fear of being the carrier of the virus – poultry prices fell while fish prices became highly volatile. Having said all of that, economy has started going back to normal with the phased unlocking of businesses in the country. For the agrochemical industry though, the long-term outlook is uncertain, for it cannot be said when the situation will improve with the arrival of a sure medicine or a vaccine.

The normal forecast of monsoon was a big boost for the agriculture sector after the widespread locust attack and difficulties with harvesting and marketing Rabi crops due to lockdown. According to GOI advance estimates, the sowing area of almost all major crops has been increased in compare to the last year. Whether the rains prove to be a shot in the arm for Kharif crops is a matter will be evident with time, though some analysts suggest that it would help the domestic agriculture-input industry to enter a favourable phase of growth after lukewarm growth for the past three years and expect more than 20% growth in the first quarter. Good rain will also ensure ample water is available for the Rabi crops, which will come at a time when, we should be hopeful that the process of unlocking has expanded.

Now let's come back on COVID19 specific issue which was originated from China. Due to the COVID19 excogitating country, many of the companies are closing their operations in China. We need to use this opportunity to backward integrate and put up capacity so that we are not dependent on imports. The central thrust of our honorable Prime Minister Shri Narendra Modi's economic package to tackle the COVID-induced economic downturn is "self-reliance". Such moves are in line with the steadily protectionist instinct of the Modi government that has been evident over the past few years.

There are many opportunities which have been generated in India during the pandemic COVID19 and many are yet to be generated. One side our industry players have taken the hard step to enter an entirely new segment as like ICL has started Indogulf Pharma and launched the sanitizer product range Giraffe and Dr. Den. These kinds of moves are strengthening the Indian industry. And another side government is planning to open the gates to the world's leading companies that are moving out of China. This will add the value in services and manufacturing which will also increase employment opportunities.

Editorial Team

REFLECTION FROM THE

GROUP CHAIRMAN

Wishing you and your family a happy, healthy and fruitful new year 2021. Year 2020 was actually COVID19 pandemic year but as an essential services we have been able to serve the farmers who are called as the backbone of the Indian economy through our strong network and quality products. Besides COVID19, 2020 was a successful year for Indogulf Cropsciences Ltd where more customers, new products were added. There was more cash flow through cash sale.

In agronomic country like India where more than 60% population is directly or indirectly dependent on agriculture, small changes in trends and policies can transform the overall prospective from farmers to consumer and vice-versa. Indogulf Cropsciences Ltd. is in the leading role in innovation and transformation. New molecules which are having low toxicity, safer for farmers and environment are being regularly introduced by ICL in the association & collaboration with world's leading research and development institutions. We are committed to introduce new technological products for farmers' welfare in New Year 2021.

In conclusion, it is important to recalibrate ourselves for the changing times and to move forward together as a team. When our core values and actions are in alignment, a thriving culture emerges. Challenges beset us, just as in life, and many times it is beyond our control. There are some days which are smoother than others and I believe we can continue to find motivation from the tenacity of the ICL team. Together, everyone achieves more!

Stay safe - Stay healthy - Stay green

Warm Regards,

O.P. AGGARWAL
Group Chairman

MESSAGE FROM THE DESK OF MANAGING DIRECTOR

The year 2020 was full of ups and downs; the COVID19 epidemic shook the entire world. In this pandemic, we learned a lot, we transformed ourselves and made new changes so that we could help our food provider in every possible way.

Despite of COVID19 there was a lot of positives also, i.e. increased cash flow & consolidation of network. Today, ICL is a leading manufacturer of Agrochemical and crop nutrient products. We have managed to create a brand name which stands for exceptional quality products, full – fledged Marketing service and the most updated R&D services for farmers' prosperity.

Our farmers stand testimonial to our efforts and claims. Our Highly experienced and skilled marketing team is our biggest strength. We have achieved quite a few land marks like "CAC Overseas Market Expansion Award", "Inclusion in CAC Recommended Supplier List" and "Outstanding Corporate Branding Awards" in year 2020 so far and we have set new targets and goals for the upcoming year 2021.

This New Year promises to bring all things great and for this reason we just can't wait. Along with all the new hopes and promises that the New Year would bring, hope it also brings us a lot more opportunities to work together. I wish you and your Family a Great, Prosperous, Blissful, Healthy, Bright, Delightful, Energetic and Extremely HAPPY NEWYEAR 2021.

Warm Regards,

SANJAY AGGARWAL

Managing Director

4 Unit-IV Technical Plant, Nathupur, Distt. Sonepat, Haryana, INDIA

Indogulf Cropsciences Ltd is a leading manufacturer and exporter of Agrochemicals including Crop Nutrients, Crop protection, Technicals, Formulations and other pesticide products in India. The Company caters to its distribution network that covers the domestic market and export to Asia, Africa, Latin America and Middle East.

Over the Last 3 decades, the company has been constantly supplying high quality and environment friendly products and providing excellent services to help farmers across the globe to increase the crop productivity. With access to latest technology, highly trained and talented team, we have become an integrated agrochemical company with R&D, Production and Export.

Today we have 8 production facilities that include technical synthesis plant, formulation plants and Blow Moulding plant in India. Each unit operates under the strictest international quality standards and has been certified under ISO 9001 for Quality Assurance and ISO 14001 for Environment Pollution Control Norms. As a recognition of its enduring efforts and sound operations in exports, we are a Government of India Recognized "Star Export House".

We have been awarded with National 1st Prize in MSM E awards for the highest quality of micronutrient fertilizers, by the **Hon'ble Prime Minister, Shri Narendra Modi.**

Indo **APACHE** *fasal jhoom ke nache*

**Attractive
keychain
with every
250gm
pack**

Recommendations:

APACHE can be used as Fertigation, Drip Irrigation, Liquid Formulation and Foliar Spray. Apply 2 – 3.5 kg/acre at the time of top dressing (Fruit Trees), 200 – 800 gm (Industrial crops, Vegetables, Cereals, Legumes, Farms), then irrigate the field, enough moisture should be available in the soil for continued nutrient mobilization and second application is recommended at the time of next application of fertilizer, it can also be used by irrigation, as it's highly soluble in water. Apply as foliar spray at 80 – 160 gm/acre and for seed treatment 60 – 80 gm/per Kg of seed.

Packing Available : 500 gm & 250 gm

INCORPORATED A VISIONARY JOINT VENTURE **INDOGULF PHARMA LLP**

The **Indogulf Group** has always been keen on innovation and contemporary business service. Our products have always added value to the business and we always strive to give our best of products with highest quality, innovative technology and overall satisfaction.

We are grateful for your trust towards our group and our products which has always been our inspiration to do better each day.

We are really excited to inform you all that we have incorporated a visionary joint venture "**Indogulf Pharma LLP**" which shall be a futuristic Business partner Company for all **Home, Hygiene & Health care** related solution.

Indogulf Pharma, the subsidiary of Indogulf Cropsciences Ltd, has launched its revolutionary product **DR. DEN** for protecting human beings from Pandemic COVID19. "Dr. Den" is a research-based 3rd generation formulation containing NaOCL, Lemon Grass Oil, Neem Oil, Anti Chocking Agents & other Performance Adjuvants which gives a complete sanitization solution for indoor & outdoor surface area and makes it a complete hygiene package for domestic as well as commercial use to sanitize your place. Dr. DEN kills almost 99.99% of harmful germs and hence supporting the war against pandemic COVID19 nationally and internationally.

Looking at the growing demand of quality sanitizing product in India and other countries, we developed Giraffe Sanitizer and Giraffe Hand Rub. The world class quality of these products protect us from various harmful viruses.

NEW LAUNCHES

The launch of a new product may seem like it's occurring at a single point of time, but a product launch has far-reaching effects. A perfect product launch could mean more sales, more happy customers and a better bottom line.

At ICL, we're no stranger to product launches. Last year (2019), we launched 8 new products which proved to be a milestone and helped farmers to double their income. Each new product is a challenge, but we've come up with a solid approach that helps us to go in market with a strong offering each time.

This year our new launched basket are filled with various revolutionary products and new verticals. These are;

STRATEGIC PLANT SUPPLEMENTS (SPS) PRODUCT

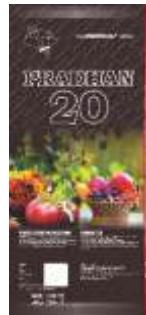

INDO APPACHE

Indo APACHE changes the fixation properties of the soil by increasing the buffering nature of the soil, which in turn improves and optimizes the uptake of nutrients by plants. It is commonly used in organic crop production, greenhouse cropping of vegetables, and in horticulture crops. It increases the water infiltration and water holding capacity of the soil. It greatly improve the soil, increase the plants root growth and metabolism, and help plants deal with the environmental stresses.

PRADHAN 20 (N:P:K 20:20:20)

PRADHAN 20 is a unique fertilizer having exclusive proportion of macro elements N.P.K. (20:20:20 + TE) which are required for growth, reproductive efficiency and higher productivity. It can be applied as a foliar spray or by drip fertigation systems. **PRADHAN 20** has high water solubility (insoluble is only 0.5%) and efficient utilization with essential micronutrients. Regular and recommended use of **PRADHAN 20** may increases production up to 20% to 50% depending on the crop.

STRATEGIC CROP PROTECTION(SCP) PRODUCT

COPRUS (Copper Oxychloride 50% WP)

COPRUS (Copper Oxychloride 50% WP) is a copper based broad spectrum fungicide which controls the fungal as well as bacterial diseases by its contact action. It also effectively controls the fungus resistant to other fungicides. Due to its fine particles, it sticks to the leaves and helps to restrict the growth of the fungus.

INDO EVERFAST (Quizalofop Ethyl 10%)

INDO EVERFAST is a Selective, systemic post-emergence Grassy Herbicide. INDO EVERFAST belongs to a new chemical class of Aryloxy phenoxy-propionates group. It acts as Acetyl CoA Carboxylase inhibitor. INDO EVERFAST is safe for broadleaf crops. INDO EVERFAST has excellent translocation activity and absorbed by leaves within one hour – rain fastness. It gets trans-located in the whole plant within one day. Weed leaves turn purplish/red within 5-8 days after INDO EVERFAST application and within 10-15 days are completely killed. INDO EVERFAST is safe for the operators and wildlife also does not cause environmental hazard due to its less dose.

NEW LAUNCHES EXPORT

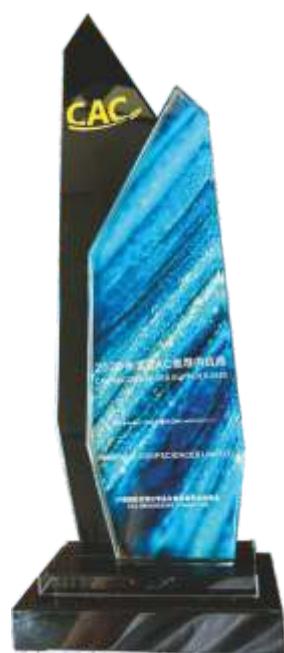

*And many
more....*

8th CAC AWARDS

With the commitment to provide the world class solution to the farming community, Indogulf Cropsciences always deliver its best in terms of quality, cost and technology. Our commitment has been recognized on various platforms also. After extensive consultation with enterprises and expert group, CAC organizing committee optimized award setting, changed the form to unveil the winners of 8th CAC Awards online, in honor of their excellent performances in 2019. CAC China has awarded ICL with the "2019 Overseas Market Expansion Awards" in June 2020 in the CAC organizing committee meeting at Shanghai, China. ICL has received this award for the third consecutive time in the last 3 years. This year ICL has also found a place in the "CAC recommended Suppliers 2020" listing, which is a proud moment for an Indian company.

A F T E R **COVID 19**

*-A Great Opportunity
to Become Self-Dependent.*

The COVID-19 pandemic has been unprecedented on many counts pertaining to public health, national security, and the global economy. Even in its initial stages, when COVID-19 was myopically perceived as a China-specific problem, it was a global conundrum — for as the finance adage goes, when China sneezes, the rest of the world catches a cold, alluding to China's position as the factory of the world.

When supply chains in China are disrupted that means supply chains around the world are disrupted. An eclectic mix of companies have been extraordinarily affected as production and distribution networks have gone awry.

But in the midst of this pandemic, as industries stall could be another form of disruption. Now the winds in Silicon Valley are changing their way. These winds of change could blow toward India, because Hon'ble Prime Minister Shri Narendra Modi's ascent to power in 2014 and the grand launch of the "Make in India" manufacturing initiative was seen as the coming-of-age of India's manufacturing potential.

While the initiative can be credited for its ambitious approach, it has been broad-based and lacked policy focus. As India progressed from an agrarian economy to services in the 1990s, the economy skipped the vital manufacturing component that made China the factory of the world.

Although Make in India sought to pitch India as an alternative manufacturing destination to China, a wide-ranging projection of 25 varied sectors, ranging from leather to space, for investment meant emphasis on the big picture at the cost of more specific sectoral details.

Furthermore, the policy has not adequately factored in India's comparative advantages. As a result, Vietnam and Bangladesh have made the most of arising manufacturing opportunities, particularly as manufacturing costs in China increased as Beijing moved to more of a consumption-driven economy.

With the ongoing trade disputes before the COVID-19 outbreak, Washington and Beijing have continuously locked horns. These developments have accelerated global firms' strategic plans to diversify manufacturing bases away from China, as a way of insuring against supply chain disruptions. Asian economic powers have begun to announce incentives to move production out of China too, with Japan even earmarking a \$2.2 billion fund to encourage manufacturers to do just that.

India's expanding economy and robust middle class provides a lucrative market while its abundant skilled and semi-skilled labor adds to the country's ability to support bulk manufacturing, assembly, and processing.

Furthermore, India's overlooked eastern coast is strategically placed to connect with Asia-Pacific markets, an advantage to optimize supply chains and minimize transportation costs.

In addition, India's cost advantages come alongside its democratic fabric, with an emphasis on transparency and rules-based international order. India's willingness to meet its supplier obligations without weaponizing trade provides the global business community with predictability and fair trade.

There is a need to capitalize on these new opportunities in India in a strategic and planned manner. The government of India should adopt a phase wise strategy. 1st phase includes immediate action, 2nd phase should be focused on temptation, and the 3rd phase will be based on long-term components.

Welcome with silver spoon (1st phase – immediate action): In the near term, the government should announce eye-catching schemes to invite companies to manufacture in India's eastern coast and traditional manufacturing clusters. To set the right tone, government should establish effective communication through business-friendly channels to convey easy availability of land in mega special economic zones (SEZs), ready-to-move-in facilities, sector-specific business-friendly regulations, a simple labor code, tax breaks, and other incentives aimed at bringing its manufacturing competitiveness on par with the most competitive destinations in Asia.

Focus on quick and easy mover (2nd phase – focused on temptation): India should aim at targeting low-hanging fruits in the next six-to-eight months, winning major investment deals in sectors where the economy has domestic supply chains. Moving up the value chain is far easier when there is an underlying ecosystem. Targets could include pharmaceuticals, agrochemicals & fertilizers, mobile phones, machinery, and other sectors where there is a robust network of small and medium-sized enterprises (SMEs). These rapid early successes will set the momentum in attracting subsequent mega manufacturing investments in other sectors.

Strengthen commercial and diplomacy roots (3rd phase – long-term components): For the rest of his second term, Government should place a special emphasis on India's commercial diplomacy, expanding diplomatic strength in key missions to engage business leaders with increased vigor. Often, India's commercial offices in prominent missions are understaffed. To this end, the government should enable the lateral entry of some of India's best private sector professionals with sectoral and negotiating expertise into the diplomatic corps. India should have its best commercial diplomats in friendly capitals like Washington, D.C., Tokyo, Seoul, and Singapore and in missions to important commercial cities, including San Francisco and Osaka, to reinforce India's position as the next big manufacturing destination.

It is usually said that India reforms with a crisis, as it did in 1991 with the Balance of Payments crisis. While the economy this time around is in a much better state, the Indian government has a chance to leverage the changing geopolitical tide to catapult India's manufacturing.

Shortly after the 1991 reforms, a popular song "Made in India" was released by Alisha Chinai; it became a sensation that gave birth to Indi-pop and sold more than 5 million copies. It's time to rechristen the "Made in India" reference from music to manufacturing and give rise to new industries and create millions of new jobs. Therein lies the hope for India.

INDOGULF

Sanitization Camps Under **Dr. Den**

Anti -COVID - 19 Combat Campaign at Various Mandies in Haryana.

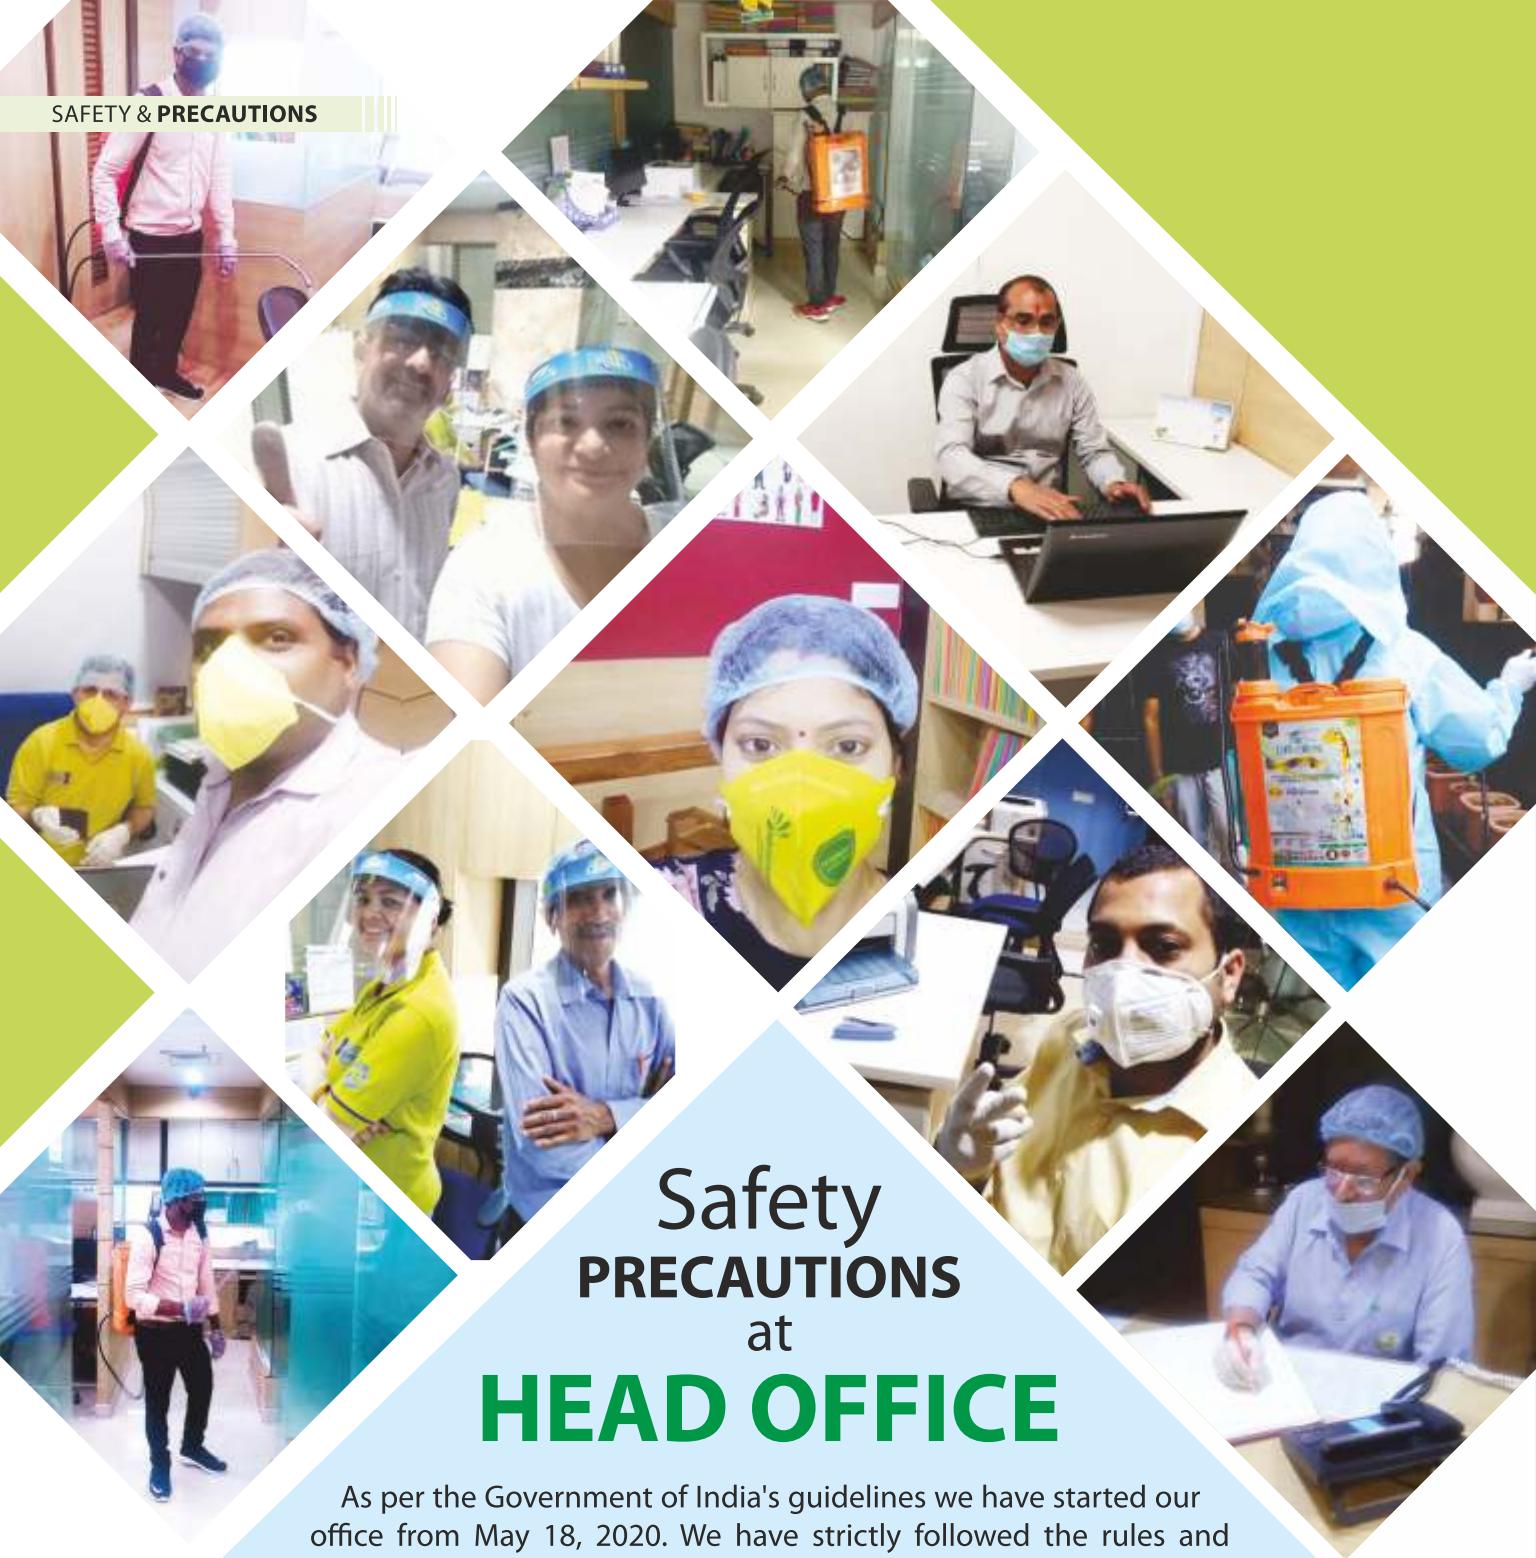

With a promise of providing world-class agro solutions to our Indian farmers, Indogulf Cropsciences Ltd, one of India's leading Agrochemical Technical and Formulations Company, in association with Indogulf Pharma LLP has organized "**Indogulf Sanitization Camps**" under "**Dr. Den Anti-COVID19 Combat Campaign**" at various mandies in Haryana. **Shri Goutam Sardana Ji, Mayer, Hisar** flagged off this campaign in Hisar Mandi and appreciated the steps taken by Indogulf Cropsciences Ltd towards the social cause, farmer's safety. **Market Committee Secretaries, Mr. Sultan Singh Ji, Mr. Chhabil Das Kedia Ji, Mandi Pradhan and Kavita Kedia, Parshad** were present on the occasion and apprised the farmers about the benefits of safety regulations such as hand washing, mouth covering and social distancing.

SANITIZATION Campaign At Delhi

CL is committed towards the welfare of our society and during this COVID - 19 where Delhi is became the major hot-spot, we have conducted various sanitization campaign in colonies and societies for safety of human being and reducing the risk of Covid-19. There are some glimpse mentioned below;

Safety PRECAUTIONS at HEAD OFFICE

As per the Government of India's guidelines we have started our office from May 18, 2020. We have strictly followed the rules and guidelines from Government of India like Proper sanitization in office, wearing Mask & Gloves and maintaining the social distancing. There are some major steps taken by ICL for safety of our employee at work place. These are;

- ICL has distributed face Shield, Face Mask, Gloves to the employee for their protection.
- ICL head office is sanitized three time in a day with Dr. Den, a revolutionary product of Indogulf Pharma LLP.
- Body temperature is measured and noted outside the main gate of the office every day.
- ICL have made arrangements to serve Ayurvedic Karha to all employees once a day.
- "Work From Home" Option is available for all Staff, if needed.

Adaptation with Current **COVID 19**

Zoom and WebEx Meeting

Our focus is to provide non-stop and timely solutions to our farming community and for that during the COVID – 19 lockdown we have transformed our working modus operandi to ZOOM and WebEx meetings. By these meetings we were able to make the forecast for Kharif Season and accordingly made ourselves active for it. Here are some glimpse of these meetings.

PRODUCT DEMONSTRATION

Product demonstration is one of the tool of development activities has been done by ICL were more focused and they are directed towards farmers prosperity. Our development activities were highly targeted in terms of crop, insect, diseases, weeds with quality product and advance technology. Keeping in mind main purpose of this tool is show the results of new innovative products from lab to land and get benefitted the farmers through manage the new emerging issue in field to avoid the resistance problems in old molecules as well as not safer for natural enemies.

FARMER'S FIELD VISIT

FARMERS' MEETING

Farmers meeting is an important tool for awareness of any agro-industry for his product knowledge in mass. ICL is using this tool for his products demonstrations and awareness in public. Through this method lot of current problems of farmers solved by highly qualified doctors in single platform. It is an important method in sustainable agriculture and Integrated Crop management practices. ICL is using this tool in throughout the country to transfer the latest Novel innovation for sustainable agriculture and farmers' Welfare.

ICL Consumer Feedback

We are working toward farmers' prosperity by providing world class technology to them. It's our pleasure to get the positive feedback from our farmers who used ICL products. Here are some farmer testimonial to describe and celebrate our success.

नाम - गुरुवंत सिंह
पिता - कुंदन सिंह
गाँव - मगना, कुरुक्षेत्र (हरियाणा)
मो. - 9729090862

मैंने अपनी धान की फसल में 4 किलोग्राम प्रति एकड़ की दर से इंडो माईकॉरिजा का इस्तेमाल किया और 10 दिन बाद जब इसका रिसल्ट देखा तो मैंने पाया की पौधों की बढ़वार पहले से ज्यादा है और कल्पों की संख्या भी पहले से ज्यादा है। अतः मैं इंडो माईकॉरिजा दवाई से पूर्णतः संतुष्ट हूँ।

नाम - बरेंदर पाल
पिता - कूलदीप सिंह
गाँव - खर-खरा, हिसार (हरियाणा)
मो. - 9812331510

मेरा नाम बरेंदर पाल है। मैंने रुट - ओ - मैक्स गोल्ड की दर से इस्तेमाल किया, मुझे रुट - ओ - मैक्स गोल्ड के इस्तेमाल से बहुत अच्छा रिजल्ट मिला। मैंने देखा कि कलियों की संख्या बढ़ गयी है और जड़ों में भी बढ़वार और मजबूती देखने को मिली। मैं रुट - ओ - मैक्स गोल्ड से संतुष्ट हूँ और इसका इस्तेमाल अब पूरे खेत में करूँगा।

नाम - अमर सिंह चंद्रावत
पिता - ऊँकार सिंह चंद्रावत
गाँव - सलवा, नागौर (राजस्थान)
मो. - 9893528932

मैंने अपनी मैथी की फसल में गजब अल्ट्रा का प्रदर्शन (डेमो) लगवाया था, मुझे बहुत अच्छे परिणाम मिले। मैथी के पौधों में फूलों की मात्रा में इजाफा हुआ और पत्तियों में भी अधिक हरापन दिखा। मैं अपनी आने वाली फसलों में भी गजब अल्ट्रा का ही प्रयोग करूँगा।

नाम - गुरजीत सिंह
पिता - सतनाम सिंह
गाँव - नेजाडेला, सिरसा (हरियाणा)
मो. - 999255517

मेरा नाम गुरजीत सिंह ग्राम नेजाडेला, जिला सिरसा का रहने वाला हूँ। मैंने इंडोगल्फ कंपनी का रुट - ओ - मैक्स गोल्ड का प्रदर्शन (डेमोन्स्ट्रेशन) अपने खेत में लगवाया था जिसका परिणाम बहुत अच्छा था। और मैं पूर्णतः संतुष्ट हूँ। रुट - ओ - मैक्स गोल्ड पौधों के कुटाव में अच्छा काम करता है। मैंने अपने 30 एकड़ खेत में इसका प्रयोग किया है।

Name - Sardul Singh
Father - S. Darshan Singh
Village - Kasam Bhatti, Faridkot (Punjab)
Mob. No:- 9417953351

I used Empire + Ankur Gold on wheat + Bassin crop as a demo. The result is good on both crops. I am satisfied from these products. I will use the Indogulf product in future also.

नाम - अनुप कुमार
पिता - सुभास चंद
गाँव - रुआ, कुरुक्षेत्र (हरियाणा)
मो. - 9053614406

मैंने अपनी जीरी की फसल में 4 किलोग्राम प्रति एकड़ की दर से इंडो माईकॉरिजा का इस्तेमाल किया जिसका परिणाम बहुत अच्छा था। फसल पहले से हरी-भरी हुई और जड़ भी पहले से ज्यादा विकसित थी। मैं इंडो माईकॉरिजा से पूर्णतः संतुष्ट हूँ।

नाम - जोगिन्दर सिंह
पिता - कोल्हिया राम
गाँव - वेदवाला, सिरसा (हरियाणा)
मो. - 9812707253

मेरा नाम जोगिन्दर सिंह ग्राम वेदवाला जिला सिरसा का निवासी हूँ। मैंने अपने खेत में इंडोगल्फ कंपनी का रुट - ओ - मैक्स गोल्ड का डेमो लगवाया था। जिसका मुझे काफी अच्छा परिणाम मिला है। मैं अपने खेत में रुट - ओ - मैक्स गोल्ड का प्रयोग करके पूरी तरह से सहभात हूँ। मैंने कई किसानों को रुट - ओ - मैक्स गोल्ड प्रयोग करने की सलाह दी है।

नाम - श्री सुनील भारद्वाज

INDOGULF LABORATORY RECEIVES NABL ACCREDITATION

With a promise of providing world-class agro solutions to our Indian farmers, Indogulf Cropsciences Ltd, one of India's leading Agrochemical Technical and Formulations Company has received the accreditation (New version ISO/IEC 17025:2017) from National Accreditation Board for Testing & Calibration Laboratories (NABL) for its Laboratories located at Nathupur, Haryana. ICL Laboratory team members under the astute guidance of the leadership of Mr. Bhupender Kaushik, Director, Indogulf Cropsciences Ltd., worked tirelessly in this endeavor.

On this occasion **Mr. Sanjay Aggarwal**, MD Indogulf Cropsciences Ltd said Indogulf has always been at the forefront of providing quality, innovative and world-class solutions to the farmers around the world. This **NABL Accreditation** for our ICL Laboratory is a proof of our high quality, innovation and commitment. Farmers are the backbone of the Indian economy and ICL is working towards farmers prosperity and doubling their income as per the vision of Honble Prime Minister Shri Narendra Modi Ji.

We humbly give the credit for the successful accreditation by NABL to the vision of our Top management, leadership team, efforts of our passionate employees, along with the culture nurtured in our manufacturing plants & offices alike. We are happy that one more accomplishment added to Group Indogulf Success Story. said **Mr. Bhupender Kaushik**, Director, Indogulf Cropsciences Ltd.

NABL certificate has been received for the pesticide technical includes 2,4-D Amine Salt, Bifenithrin, Chlorypyrifos, Clodinafop propargyl, Cypermethrin, Lambdacyhalothrin, Pretilachlor, Profenofos, Thiamethoxam and their formulations.

Recently Indogulf Cropsciences has been awarded with Overseas Market Expansion by CAC organizing committee. The CAC Committee has also listed Indogulf Cropsciences Ltd in their list of 2020 CAC Recommended Supplier. Further ICL received Outstanding Corporate Branding Awards from Institute of Technology and Science, a leading Management Institute in India. All of above accomplishment was not possible without the dedication, hard work and sincere efforts made by Mr. Saurabh Abhiranjan (CEO), Dr. PC Rai (VP Corporate Affairs) and Mr. AS Negi (GM Marketing).

About Indogulf Cropsciences Ltd.

Indogulf Cropsciences Ltd is a leading formulator & Technical manufacturing company. ICL is also pioneer in producing Plant Nutrients and a big Export house for Agrochemicals & Crop Nutrients. The Company caters to its distribution network that covers the domestic market and export to Asia, Africa, Latin America, and the Middle East. Having branch offices in Australia and USA ICL produces Technical also for Lambda, Pretilachlor, Bifenithrin, Pyrazosulfuron, Thiamethoxam and many more. Over the last 3 decades, the company has been constantly supplying high quality and environment-friendly products and providing excellent services to help farmers across the globe to increase the crop productivity. With access to the latest technology, highly trained and talented team, we have become an integrated agrochemical company with R&D, Production and Export.

Today they have SEVEN ultra-modern production facilities that include one technical synthesis plant and 6 formulation plants in India. Each unit operates under the strictest international quality standards and has been certified under ISO 9001:2008 for Quality Assurance and ISO 14001:2004 for Environment Pollution Control Norms. As recognition of its enduring efforts and sound operations in exports, the company is a Government of India Recognized A Star Export House.

They have been awarded with 1st Prize in MSME awards for the highest quality of micronutrient fertilizers, by the Hon'ble Prime Minister, Shri Narendra Modi.

AGROCHEMICALS PRODUCTS

THE INDOGULF GROUP IS PROUD TO BE THE WINNER OF COMPANY OF THE YEAR 2020 AWARD BY INDUSTRY OUTLOOK

PROMISING FORMULATION WITH DEVELOPED
FECUNDITY

Agrochemicals are specially engineered chemical product for use in agriculture in order to enhance crop productivity and protect the crop from pests, fungi and others. Agrochemical market size is expected to reach USD 336.4 billion by the end of 2026, registering a CAGR of 4.2%. Considering the current global population scenario, it is of extreme importance to increase the production of crop within the present arable land in order to feed the global population. Thus, agrochemicals play an important role in the agriculture industry, assisting farmers in enhancing their crop quality as well as quantity.

We are committed towards 'Farmer's Prosperity' with our business mantra 'Grow together'. Our dedicated team is always in contact with the farmers and helps them to improve the production by the world class technological products of ICL

The opportunity of Indian Agrochemical Industry, due to easily available resources like raw material, labor etc. and ease - of - doing business policies, India

is now ready to lead the world in agrochemical Industry. Indogulf Cropsciences Ltd (ICL) have also re-structured and come out as a leading agrochemical manufacturer for the farmers around the world. Whereas, the scenario after independence or before green revolution started in India, the production was nearly 50 MT and India was not able to feed the people. During 1960's the Father of Green Revolution, Prof. MS Swaminathan came up with the new hybrid seeds which had become the foundation of Green Revolution and started from western part of UP. Now, in today's scenario India is the leading country in contributing agriculture in the world. Agrochemical with the new technologies has changed the pedagogy of agricultural practices from traditional to modern. Using low dose molecules which give the effective control on insects, weeds and diseases, ICL is working towards 'farmers Prosperity' and advocating the judicious use of agrochemical, minimizing the input cost and maximising the profit in large, which is also one of the biggest challenge of Indian Agriculture.

Standardized Methods for Potency and Progress

Indogulf Cropsciences is a leading manufacturer and exporter of Agrochemicals in India. The Company caters to its distribution network that covers the domestic market as well as export to Asia, Africa, Latin America and Middle East. Over the last 3 decades the company has been constantly supplying high quality and environmental friendly products and providing excellent services to help farmers around the world to grow better crops. With access to the latest technology and with highly trained and talented staff, the firm has become an integrated agrochemical company with R&D, Production and Export.

The Indogulf Group has always been keen on innovation and contemporary business service. Its products have always added value to the business of its channels partners and it always strives to give its best of products with highest quality, Innovative technology and overall satisfaction. It is the 1st prize winner of "MSME Award" by Government of India. Its "Kite" mascot is very popular amongst farmers all over India. It is one of the leading exporters of Agrochemicals across the Globe.

It has its own R&D farms in Nathupura (Haryana), Ajeetgarh (Rajasthan), Ludhiana (Punjab) and Badwasni (Haryana) for taking trials of our products. The company also inaugurated its new branch in Australia in 2019.

Business Associates:

"Inaugural of Indogulf Pharma LLP was need of the hour, in the time of Covid crisis. It is our Businesspartner Company for all Home Care with Hygiene and Health related solution. It gives complete hygiene package of sanitization solution for indoor and outdoor surface areas. Our mascot is "Giraffe" who is always standing for life."

"Max Indo Pvt. Ltd. is one stop shop for complete packing solution. It has rich experience of three decades in the business of blow moulding and is now a leading manufacturer of HDPE plastic drums, Pails & PET bottles and Jars in India. We believe in Train-Trust-Transform."

"Indo Organics Pvt Ltd. offers a mix of organic products and a range of non-organic pesticides, fungicides, plant nutrients, crop boosters and energizers. The product matrix has been developed as

per the stage of the crop and the farmer is being educated about this through markings on the pack design. Our mascot is a "Key" which we believe is the Key to Success."

Upcoming Venture:

Abhiprakash Globus Pvt Ltd. is its green field project in Badwasni (Haryana). It'll be its upcoming manufacturing unit for contract manufacturing of Agro chemicals and FMCG products.

Moreover, at ICL the group owns 4 production bases that include one technical synthesis plant & 3 formulation plants in India. Each unit operates under the strictest international quality standards and has been certified under ISO 9001 for Quality Assurance and ISO 14001 for Environment Pollution Control Norms. The firm has its own NABL accredited laboratory and research form around all agro climatic zones in India. Providing better solutions to the farmers, having the category indicative packing to recognize and identify the product as per the need of the farmers. "We are committed towards 'Farmer's Prosperity' with our business mantra 'Grow together'. Our dedicated team is always in contact with the farmers and helps them to improve the production by the world class technological products of ICL," signifies Sanjay Aggarwal, Managing Director of the company.

Indogulf Cropsciences

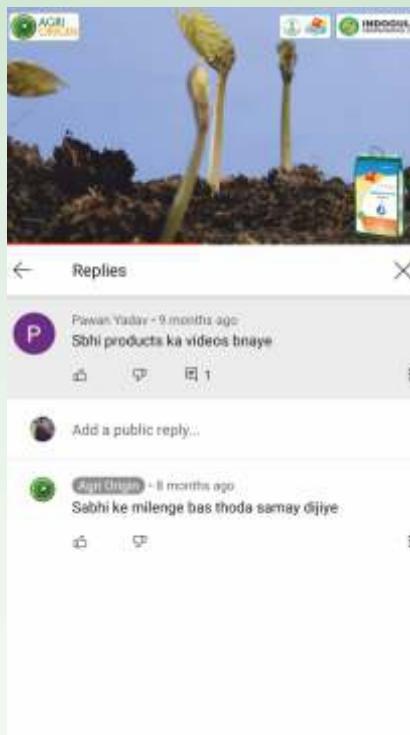

In addition, ICL has extensive reach of products which helps to reduce the crop losses due to insects, weeds and diseases and improve the production which helps to increase the profit of the farmers. Especially the revolutionary product 'EMPIRE' claims 100% satisfaction guarantee to the farmers.

Other products like Root - O - Max Ultra, Picasso Power, Picasso Gold, Ankur Gold, Plano Gulf, Port, Orion Gold, Gulf Top, Savera etc. are setting new milestones. The organization is regularly introducing new and revolutionary molecules which are used in low dose and gives high result in low input cost. These products are also less toxic and not harmful to the environment and soil. Subsequently, the major products in plant protection are DAWN 7000, DOMINATOR, KRANTI, FARRATE, FANG, SITARA, JABAR, LOGIC AND CORSA etc. which offers effective control on insects, weeds and diseases and increases the production. With more than 6000 distributor and 70000 dealers Indogulf is having a strong presence in domestic market as well as in the international market, exporting the product to more than 25 countries.

As per the current growth rate Indogulf is going well and in the future it believes that the firm will achieve all the goals which have been set. In coming years ICL sees itself as a top five agrochemical manufacturer and exporter. "Farmers are the backbone of any economy; I believe working towards 'Farmer's Prosperity' help us to work for India. Our aim is 'Happy Farmers' that can be achieved together. So let's grow together with Indogulf for farmer's prosperity" concludes Sanjay.

DURGA STHAPNA AT NATHUPUR UNIT-3

13th Dec, 2020

BHANDARA FOR WORKERS

Bhandara for workers – We provided Bhandara to our workers at all our production locations.

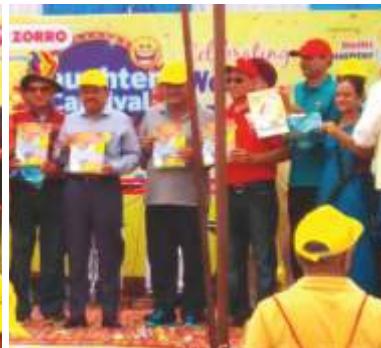

CHARITY DURING COVID LOCKDOWN

We played a vital role in fulfilling our social responsibility to help someone in need by distributing eatables to the needy during lockdown crisis situation.

DR. HARSH VARDHAN

(Executive Board Chairman, WHO)

India would now be playing a more prominent role at the World Health Organization (WHO), with Union Health Minister Dr Harsh Vardhan took charge as chairman of the WHO Executive Board at its 147th session. Shri Harsh Vardhan would succeed Dr. Hiroki Nakatani of Japan, currently the Chairman of the 34-member WHO Executive Board.

The WHO, a specialized agency of the United Nations responsible for international public health, is currently at the forefront of global efforts towards containing the novel coronavirus pandemic.

India is a member state of the South East Asia Region at the WHO. Last year, the bloc had unanimously decided that India's nominee would be elected to the executive board for a three-year term beginning from May.

RESPECTED MD SIR WITH MINISTER OF AGRICULTURE

During the event called ““भारत का राष्ट्र दर्शन एवं अद्यात्म”” organized by “Rastriye Swam Seval Sangh (राष्ट्रीय स्वयंसेवक संघ)” our respected MD, Shri Sanjay Aggarwal had a meeting with **Shri Narendra Singh Tomar Hon'ble Minister of Agriculture & Farmers Welfare** and discussed regarding the current issue faced by Indian farming community.
